

The BRAIN Centre: Biomarker Research and Imaging for Neuroscience

Department of Neuroimaging

Institute of Psychiatry, Psychology and Neuroscience

Staff Scientist for Preclinical MR physics and analysis

This is an exciting opportunity to join the world-renowned Department of Neuroimaging at IOPPN.

You will be responsible for day to day operations and maintenance of the new 9.4T Bruker MR scanner in the The BRAIN Centre for preclinical imaging at Denmark Hill. This will include developing and applying routine & novel acquisition and analysis techniques, with emphasis on the central nervous system.

You will work closely with the Centre Manager and the Biologist to support a diverse range of projects including structural and functional MR imaging and spectroscopy.

This is a Grade 6 full-time post for 5 years. For further details see [HireWire](#)

Or contact diana.cash@kcl.ac.uk for informal discussion.

Closing date 1st March 2017.
