

Women's Mental Health Research Summer School

4th - 6th July 2017

For more information,
please email
admin-swmh@kcl.ac.uk

This course provides an introduction to research methods to investigate risk factors and the effectiveness of interventions for women's mental health problems.

On completion of the course, students will be able to:

1. demonstrate knowledge of gender differences in the prevalence, presentation and prognosis of mental disorders and biological and sociocultural influences on these differences.
2. identify and develop strategies to manage key ethical and safety issues in women's mental health research.
3. evaluate research designs and methodologies used in women's mental health research.

"Really interesting, useful
and inspiring course."

"Excellent introduction to a
diverse range of topics."

Course Information

The course takes place over 3 days (one, two or three day attendance is available)

- Day 1: Introduction to women's mental health and research methodologies

-

- Day 2: Perinatal mental health

-

- Day 3: Violence to women and mental health

About the Section of Women's Mental Health

The Section of Women's Mental Health (SWMH) undertakes mental health services research with a primary focus on women's mental health. Our aims are to carry out research into the needs of women with mental health problems using epidemiological and qualitative methods, and to develop and evaluate interventions to meet those needs and inform health policy.

One example of our work is the ESMI programme, which is funded by the National Institute for Health Research's Programme Grants for Applied Research (PGfAR) Programme.

For more information about the SWMH, and for details on our current research projects, please visit: www.kcl.ac.uk/swmh
