

The Essex Big Data and Analytics Summer School aims to provide a research training event and forum for knowledge exchange and networking for graduates, postgraduates, researchers, academics and business professionals and practitioners in the emerging fields of Data Science, Analytics and Big Data.

The Summer School will cover a range of topics from the methodologies and techniques for Big Data and analytics, practical applications such as in business, health and other sectors, the curation and management of data as well as the legal, ethical and human rights implications of data.

The Summer School is over a two week period and participants can opt to attend one or the full two weeks. Courses are delivered over parallel sessions and the Summer School includes keynote talks, social and networking events. A typical course is 6 hours in length and it may be at an introductory, intermediate or advanced level.
