

Research Technician Position in Protein Expression and Purification

A Research Technician position is available in the Berger-Schaffitzel laboratory at University of Bristol, UK to support our research on the structure and mechanism of key multiprotein complexes in human translation and mRNA quality control.

We are seeking a highly-skilled Research Technician to actively participate in the ambitious research projects in our laboratory. The successful candidate will engage in designing and preparing DNA constructs, recombinant expression and purification of proteins and complexes, and participate in the structural and functional characterization of these.

Applicants should have a strong background in protein biochemistry and molecular biology. Experience in cell culture is highly desirable.

The post is full-time and **up to five years**.

The closing date for applications is **8th July 2018**.
