

CALL FOR PAPERS

TRANSNATIONAL CORPORATIONS

INVESTMENT AND DEVELOPMENT

Transnational Corporations is a longstanding policy-oriented refereed research journal on issues related to investment, multinational enterprises and development. It is an official journal of the United Nations, managed by the United Nations Conference on Trade and Development (UNCTAD). As such it has a global reach, a strong development policy imprint, and high potential for impact beyond the scholarly community. *Transnational Corporations* aims to provide a bridge between academia and the policymaking community.

Through UNCTAD's wider development community and its network of investment stakeholders, the journal reaches a large audience of academics, business leaders and – above all – policymakers. Its contents gain significant visibility and contribute to debates in United Nations conferences and intergovernmental meetings, including the *World Investment Forum* and the *Investment and Enterprise Commission*. The work published in *Transnational Corporations* feeds directly into UNCTAD's various programmes related to investment for development, including its flagship product, the annual *World Investment Report*, and its technical assistance work (investment policies reviews, investment promotion and facilitation and investment treaty negotiations) in over 160 countries and regional organisations.

The journal welcomes submissions from a variety of disciplines, including international business, innovation, development studies, international law, economics, international finance, political economy and economic geography. However, submissions should be accessible across disciplines. Interdisciplinary work is especially welcomed. The journal embraces both quantitative and qualitative research methods, and multiple levels of analyses. It welcomes contributions from the academic community, policymakers, research institutes, international organisations, and others.

The journal provides a unique venue for authors' work to contribute to, and impact on, regional, national and international policymaking processes.
