

Postdoctoral position

Structural Biology, cryo-EM, Bilbao

A postdoctoral position in Structural Biology is immediately available in the Membrane Trafficking Lab lead by Dr. Aitor Hierro at CIC bioGUNE in Bilbao, Spain. Current studies are focused on supramolecular organization and function of endosomal coat complexes using a combination of X-ray crystallography, cryo-electron microscopy (cryo-EM) and cryo-electron tomography (cryo-TM). This is a full-time, two-year position funded by a grant from the Spanish Ministry of Economy, program “Retos Investigación”.

Applicants must have a Ph.D. in biochemistry, biophysics, structural biology or a related field. The ideal candidate should have experience in cryo-EM/TM and image processing with a demonstrated record of accomplishments.

The Structural Unit at CIC bioGUNE is very well equipped for the structural work holding access to X-ray crystallography, NMR and EM local facilities as well as regular access to synchrotron and world-class cryo-EM/TM platforms.

Candidates should submit their CV, a cover letter and the name and contact details of, at least, 2 references using the following [link](https://www.cicbiogune.es/job-offers-form) (<https://www.cicbiogune.es/job-offers-form>) and indicating 43131 as reference.

The deadline for application is November 5th, 2018
