

**Call for Papers for Sessions of the
Research Area [Q] - Complexity Economics
at the 30th EAEPE Annual Conference (Warsaw, September 12-15, 2019)**

The Research Area [Q] – Complexity Economics of the European Association for Evolutionary Political Economy (EAEPE) invites contributions for this year's annual meeting, to be held in Warsaw (September 12-15, 2019). RA [Q] – Complexity Economics aims to offer a forum within the EAEPE to discuss recent methods from complex systems science and their application to economic questions.

Both the possibilities for complex systems science and their impact on real-world social and economic systems continue to grow. What can we learn from massive data sets on prices, on patents, on firms, or on the socio-economic sphere? How can we improve our methods to understand patterns and dynamics in these and other data sets? What do we know about distributions of economic entities, about diffusion processes, or about the structure of economic networks? And, more importantly, what do we not know? What does this mean for evolutionary and political economics and for economic policy?

It is our great pleasure to announce that we welcome submissions on topics within the field of economic complexity. We are particularly excited about:

- Contributions on applications of complex systems science methods in economics.
- Methodological advances in complexity economics.
- Ontological, epistemological, and history of thought contributions concerning complexity economics.
- Interdisciplinary approaches in complexity sciences.

We will also consider contributions on other topics that are closely related to complexity economics. Please find attached the full description of the Research Area [Q]; see also the [website: https://eaepe.org/?page=research_areas&side=q_complexity_economics](https://eaepe.org/?page=research_areas&side=q_complexity_economics).

Abstracts should be submitted through the official submission system on the EAEPE website. Please select Research Area [Q] (Complexity Economics) in the drop-down menu for the field the abstract should be considered for.

The submission deadline will be April 1st 2019; authors of accepted submissions will be notified after April 30th.
