

CONNECT CONSERVE PROTECT
EARTH WEEK 2019

april 22 - 29

In celebration of Earthweek, MapWorks Learning is launching a new Global year long Challenge focused on solutions to Climate Change. Interested in connecting your classroom to others abroad and collaborating on solutions to Climate Change? MapWorks Learning is currently accepting new classrooms free of charge to join Narrative Atlas - an online community focused on global competencies, digital literacy and reaching the U.N. Sustainable Development Goals. If you are interested in joining our challenge, please send an email to hello@mapworkslearning.org.

MapWorks Learning

Interested in connecting your classroom to others abroad and collaborating on issues that matter? Join Narrative Atlas - an online community focused on global competencies, digital literacy and reaching the U.N. Sustainable Development Goals

Here is what you can expect during your journey on Narrative Atlas!

Guided Activities

Students are given a series of tasks using the platform's rich set of tools: with a couple clicks, they can create and post videos and images, share learning resources, make maps, and more--all in one secure place

3

Solutions present

To exhibit their learning publicly, students document their work and present their solutions both in their home communities and online.

6

Private groups are created

Students and teachers from the two classrooms are added to a private online group. Their first activity is to complete a personal profile (answers to "Who Am I?" prompts) to introduce themselves to the group.

2

Students Collaborate

Students communicate and collaborate on action plans to take action locally to address an SDG.

5

Classrooms are matched

We help pair your classroom with a classroom in another part of the world. An online teacher group is created to help you and your counterpart finalize your area of investigation, plan activities, and ensure outcomes align to one another's curricular needs.

1

Students Investigate

With the teachers' guidance, students learn about a particular global challenge, investigate how it affects their local community, and teach their new friends about what their community is doing to address the challenge.

4
