Japanese Resistance to American Financial Hegemony

Global versus Domestic Social Norms

Fumihito Gotoh

Series: RIPE Series in Global Political Economy

This book investigates why the convergence of Japan's bank-centered financial system to an American-style capital market-based model has lost steam since the mid-2000s, despite financial deregulation during the 1980s and 1990s. With a focus on social norms, bureaucracy, credit rating agencies, industrial associations and corporate governance, this book will provide useful insights for scholars and students of international political economy, sociology, cultural studies, and business studies.
