The examiner does not need to have specific research experience in all courses but should be able to demonstrate previous experience of, and competency in, evaluating various assessments across Microbiology related courses/modules at undergraduate level. The timeline of activity and examiner meetings will be:

- December: attend Level 4 student project presentations (optional, normally over 2 days).
- February/March: review and approve exam papers (by e-mail).
- June: attend Board of Examiners meeting. This normally takes place in early June.

The new examiner will be appointed in September 2020. We are advertising now to allow the successful applicant the opportunity to shadow this June's Examiners meeting in preparation for taking over the role in September.

If you are interested in applying for this role please e-mail your CV (and/or any questions you may have) to [Olwyn.Byron@glasgow.ac.uk](mailto:Olwyn.Byron@glasgow.ac.uk) by Friday 20 March, 2020.
