

1-year post-doc position @ Unipr – Department of Economics and Management

Project: drafting of ERC proposal on the **Socio-economics of Workplace Artificial Intelligence Technologies (WAIT)**

The proposal aims at investigating the socio-economic causes and consequences of WAIT use by combining different methods: appreciative and formal theorizing, behavioural and survey experiments, patent analysis and applied econometrics.

Candidates with a background in **applied and behavioural economics**, **economics of science and technology**, **economic sociology** and **sociology of work** are invited to apply.

Working conditions:

- **No teaching**
- **50% of the time** devoted to the **drafting of the ERC proposal** in cooperation with the PI (the remaining time the Postdoc is free to carry out his/her own research in autonomy)
- **Physical presence** in the department is preferred but **not mandatory** (project drafting is based on weekly targets)

Expected opening of the call: **27 July 2022**
